KFD 840

Primary Flight Display

Here's Something New From Bendix/King

Bendix/King has long been associated with the words quality, reliability and especially innovation and user friendliness. Our new line of products will not only build on that heritage but push the boundaries on what modern avionics are all about. Everything Bendix/King produces is designed to increase situational awareness and make flying safer and easier. And, as always, all Bendix/King products are backed by a worldwide support organization dedicated to complete customer satisfaction.

Why Bendix/King?

At Honeywell, we have proven support for our Bendix/King Avionics and are leaders in the aviation industry. Our reputation for innovation, reliability and service are unmatched. And Honeywell's global customer support system worldwide means that whenever you need support of Bendix/King avionics, we'll be there.

KFD 840

The KFD 840 is an affordable replacement option for all the analog instruments in the steam gauge "six pack." It can complement other systems or be used as a standalone Primary Flight Display for Bendix/King's new line of avionics including the similarly styled KSN 770 Next Generation GPS/NAV/COMM. It is designed to integrate with common autopilots including the Bendix/King KFC line and common Nav and GPS systems including all KSN and KLN products. Other features include:

- Large, 8.4-inch LCD fits easily into the space traditionally occupied by steam gauges
- Internal Air Data Attitude Heading Reference System (ADAHRS) with remote magnetometer
- Weight & Balance and Checklist
- Optional engine instrument monitoring
- Full TSO on display and the ADAHRS subsystem
