

Avionics Kits EXPAND YOUR CAPABILITIES

Southeast Aerospace (SEA) has a fabrication department dedicated to avionics kit production

Realizing that avionics installations can be time consuming and inconvenient to operators, SEA has developed a multitude of ready-to-install kits that allow for installation of even the most complex systems at virtually any location.

With these kits, the means to offer avionics installations to most customers is available.

SEA believes that with these installation kits and your qualified avionics technician, your company can instantly expand your avionics service capabilities.

SEA has been established as a Production Approval Holder (PAH) by obtaining a Parts Manufacturer Approval (PMA) from the FAA.

Kits Available:

- ✈ HF
- ✈ TAWS
- ✈ TCAS
- ✈ Radar Systems
- ✈ Garmin Radio Packages
- ✈ A & B Kit Manufacturing

Previous Kits:
