SEA Cherokee Six Installation

April/May 2004

Southeast Aerospace successfully completed an avionics retrofit into a 1972 Piper Cherokee Six PA-32-260. The existing TKM MX-170B Nav/Comm, King KN-75 remote glideslope receiver, and Narco DME-190 were removed and retrofitted with a Garmin GNS-530 GPS/Nav/Comm.

The existing pilot-side KI-209 VOR/ILS/GS indicator was removed and retrofitted with a complete King KCS-55A HSI System. The KCS-55A was interfaced to the existing, original equipment Autopilot system by way of a King KA-57 autopilot adapter and Century 1C388 radio coupler. L3/Goodrich WX-500 Remote Stormscope was also installed and interfaced for display on the Garmin GNS-530.

The installation was completed in approximately 10 days.
