PRODUCT DISCONTINUATION NOTICE**KA 61 TO REPLACE KA 60 IN 2005**

Honeywell is pleased to announce the availability of the new, TSO'd KA 61 L-band antenna, which will be a direct replacement for the KA 60 antenna. In conjunction with the availability of the new unit, Honeywell will discontinue new production of the KA 60, effective December 15, 2005. Final deliveries must be scheduled prior to this date.

The KA 61 offers numerous improvements over the current KA 60 antenna. The KA 61 can be ordered in either BNC connector or TNC configuration. Honeywell recommends the TNC configuration due to improved electrical connectivity and signal performance. The KA 61 is lightning-qualified for improved reliability, and supports Honeywell transponder, DME and IHAS installations. Antenna information, including pricing, is provided in the table below and on the attached antenna drawing.

1. Discontinued Units

Unit Number	Part Number	List Price
KA 60	071-01591-0001	\$110

2. Units Now Available

Unit Number	Part Number	List Price	Description
KA 0061	071-00221-0010	\$119.00	BNC Connector
KA 0061	071-00221-0020	\$119.00	TNC Connector

3. Order Information and Support

Final orders for the KA 60 antenna must be placed by December 15, 2005, with a scheduled delivery date on or before December 31, 2005. All standard Terms and Conditions from the current Price Catalog apply.
