

QUALITY POLICY

Southeast Aerospace strives to consistently provide the highest quality products and services that meet or exceed the requirements and expectations of our customers. All interaction with customers and vendors will be conducted with the highest degree of professional integrity and ethical behavior. We will actively pursue improving the quality of our products and services through routine process reviews, audits, employee training and customer feedback. We will monitor and review our process based Quality Management System and address the risks and opportunities that could affect conformity and on-time-delivery of our products and services.

Southeast Aerospace commits and empowers its employees to implement this policy through the following actions:

- Clearly understanding customer needs and providing products and services that meet those needs.
- Integrating quality management principles with critical business processes and decision-making practices.
- Continuously improving the effectiveness of our Quality Management System, our processes and products, to enhance their value to all relevant interested parties.
- Establishing quality requirements and ensuring suppliers, partners and contractors are compliant.
- Ensuring our Quality Management System conforms to the requirements of AS9100D.
- Complying with regulatory and statutory requirements.
