# Southeast Aerospace

**Cessna Citation S550**

Southeast Aerospace completed a European requirements / EHS installation in a Cessna S550.

SEA installed a CAS-67A TCAS-II system with dual MST-67A transponders. This system was configured for Enhanced Surveillance (EHS). Also integrated into the new install was an Artex C406-2 ELT, and dual VHF-22C's with corresponding CTL-22C's. A closeout panel in the nose of the aircraft, and a new center panel were fabricated to accommodate the new equipment.

This equipment package was carefully selected by SEA to meet operating requirements in Europe.

FAA/EASA APPROVED REPAIR STATION # S66R266N  
1399 General Aviation Drive | Orlando Melbourne Intl. Airport | Melbourne, FL 32935 USA
