### UH-60P Blackhawk Helicopter AAR/ALE Installation

Southeast Aerospace designed installation kits and installed the AAR-47 and ALE-47 missile warning and flare dispense systems in four UH-60P helicopters. All four aircraft were modified on site in Southeast Asia by an SEA modification team.

SEA design included:

- Systems electrical interface
- Forward sensor fairings & a customized vertical stabilizer fairing
- 2-Axis flare dispenser bracket fabrication
- Tailboom structural fortification

The aircraft mission was for foreign military to provide airlift support in Afghanistan. The installation project was completed in time to meet the customer's airlift schedule for deployment.
