SEA Hughes 369FF Helicopter Installation

Southeast Aerospace finished a complete avionics retrofit into a Hughes 369FF helicopter. Since every piece of avionics was retrofitted a new panel was cut for this job. Installed into the new panel included the Garmin GNC-250XL VFR GPS/Comm, Bendix/King KCS-55A H.S.I. / Compass System, and KRA-10A Radar Altimeter System.

A new pedestal was fabricated for this helicopter as well. To match the existing avionics in this customer's helicopter fleet, the KY-196A VHF Comm and KT-76A ATC Transponder were installed. Due to the tactical environment this helicopter operates in, the Nothern Airborne Technologies AMS-42 Audio Control and Technisonic TFM-138 VHF/FM Transceiver.
