JA30-001 Volume Control Panel
## Data Sheet

Description

The JA30-001 Volume Control panel provides individual volume control and on / off selection for up to nine audio channels. The volume knobs provide the push on / push off facility for each audio channel.

A passive emergency mode provides a direct connection between audio input and output for two channels.

Each channel has a receive signal detection indicator and all selected audio channels are summed to a composite output.
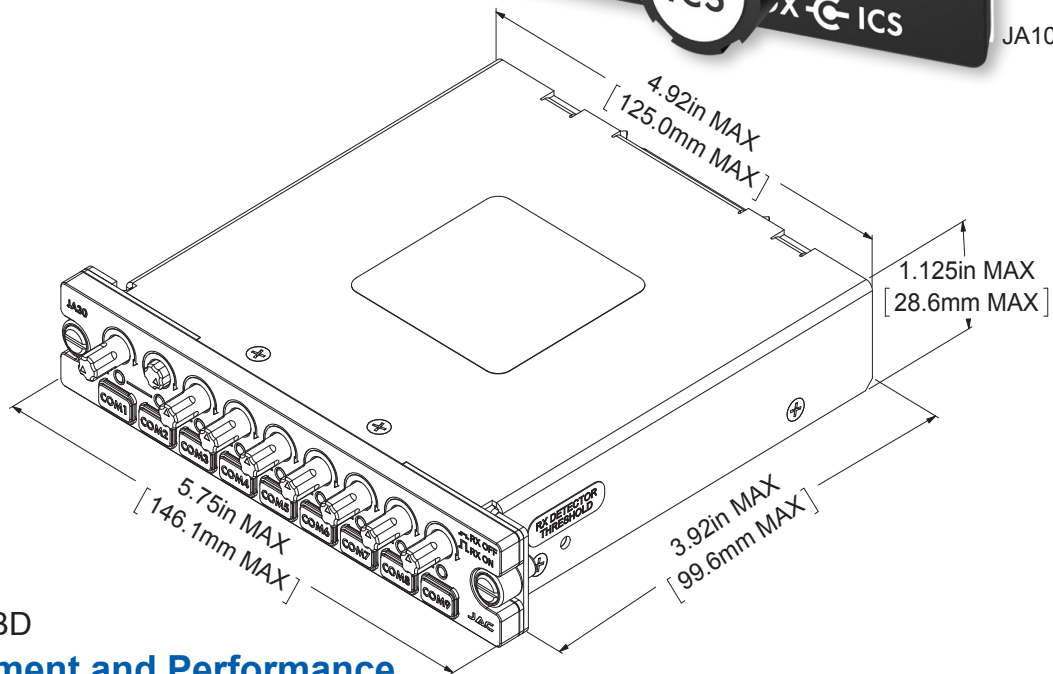

Features

- Compact, lightweight design
- Field replaceable front panel legends
- Legends dimmable from the 28 Volt lighting bus
