

721-1058-101 / 723-1078-XXX

The Hoffman cockpit utility light, commonly referred to as a C-4 light, differs from other designs in that it uses LEDs as its light source. Among the many benefits of this new design are greatly improved illuminance, low current draw, high reliability, "cool" operation, and lighter weight. The LED sources used in this light have a rated life of 50,000 hours. Unlike standard incandescent lamps, LEDs can achieve this long life as there are no filaments to fail due to shock or vibration. NVIS versions are also available in NVIS White or NVIS Green-A.

Product Specifications

- **Light Source:** White LED
- **Housing Material:** High temperature Ultem
- **Housing Color:** Textured black
- **Power Requirements:** 28 VCD, 125 mA
- **Dimming:** Full range
- **Color:** Unfiltered, Visible White, NVIS White, NVIS Green A
- **Weight:** 7 oz.
- **Mounting Base:** Same footprint as MS17245 / MS17246
